

SALESFORCE DEVELOPMENT

Apex

- What is Apex and its Feature
- When to Use and Flows of Action
- Features not supported by APEX
- What are Apex Environments?
- Tools for Code
- Apex Variables and Apex Literals

Data Types and Operator

- APEX Data Types
- sObjects
- Generic sobjects
- Rules of Conversion
- Collections
- Lists
- Nested Lists
- Sets
- Maps
- Operators

Logic Control and Looping Statements

- Logic Control and Looping Statements
- Looping Assignment Questions

SOQL

- SOQL Basics
- How to Write SOQL in APEX
- SOQL Variable Binding
- SOQL Return Type
- SOQL Functions
- SOQL Keywords
- Date Literals
- Child to Parent Relationship
- Parent to Child Relationship
- 4.10. Multi-level Relationships
- Dynamic SOQL

SOSL

- What is SOSL?
- How to Access Record in Apex Returned by SOSL

- Return Specific Fields
- Wildcards in SOSL
- SOQL via SOSL

Apex DML Statements and Database Method

- Apex DML Basics
- DML SOQL Best Practices
- Database Class 6.4. Empty Recycle Bin
- Count Query
- Lead Conversion
- Transaction Control and Rollback
- Database Class Method Result Object

Exceptional Handling

- Basics
- System Defined Exceptions and Types
- Custom or User Defined Exceptions

Apex Triggers

- Basics
- Definition
- Types of Trigger
- Trigger Order of Execution
- Trigger Context Variables
- Best Practices for Triggers
- Trigger Exceptions

Apex Test

- Basics
- System-Defined Methods
- Test Data
- Unit Tests

Governor Limits and Batch Apex

- What are Governor Limits?
- Governor Limit Types
- Batch Class
- Schedule Batch Class in APEX
- Execute Batch Class in APEX
- Access Modifiers
- Namespace

Visualforce

- Basics
- Architecture
- Standard Controller
- View Pages
- Edit Pages

- Custom Controller
- Order of Execution
- System Mode

Lightning LWC

Introduction of LWC

- Basics
- System-Defined Methods
- Test Data
- Unit Tests

Data Binding & Rendering

- Use HTML Template
- Data Binding
- Element Rendering

Lifecycle Hooks and Composition

- Lifecycle Flow
- Constructor
- connectedCallback and disconnectedCallback
- renderCallback
- errorCallback
- Compose child components

Communicate with Events

- Create & Dispatch Event
- Parent to Child Communication
- Child to Parent Communication
- Handle Event

Communicate with Events

- Create & Dispatch Event
- Parent to Child Communication
- Child to Parent Communication
- Handle Event

Wire Adapters & Functions

- Use of Wire Service
- Example
- Error Handling

Work with APEX

- Import Apex Methods
- Expose Apex Methods to Components
- Wire Apex Methods
- Imperative Apex

Use Components in Salesforce Targets

- Lightning App builder
- Flow
- Quick Action

Integration.
