

GRAPHIC DESIGN AND ANIMATION

1 year

Adobe Photoshop
Adobe Illustrator
CorelDRAW
Indesign
Adobe Premiere
Adobe After Effects
Adobe Audition
Sound Forge
Moho
Maya
Max

Adobe Photoshop Module

MODULE - 1

Introduction to Adobe Photoshop Interface

Use of Photoshop tools

Panels and workspace

- Layers
- Layer styles
- Layer effects
- Adjustment layers
- Selections
- Quick selections
- Selection Manipulation
- Masks
- Channels
- Window Options

MODULE - 2

- Basic Photo Corrections and Manipulations
- Resolutions and Image Size
- Retouching Photos
- Camera Raw
- Image distortion
- Image color Correction
- Depth of Field

MODULE - 3

- Typography
- Creating Clipping mask from type

- Creating type on a path
- Warping point type
- Designing Paragraphs of type

MODULE 4

- Vectors and Drawing
- Bitmap and Vector Images
- The use of Pen tool
- The use of Path with artwork
- Working with custom shapes and smart objects

MODULE 5

- Digital Painting
- The use of Mixer Brush
- Brush settings
- Use of Custom Brush Preset
- Mixing Colors with Photographs

MODULE 6

- Matte painting and compositing
- Montage of Images
- Applying Filters and Smart Filters
- Use of Color Schemes
- Use of Drop Shadows and Border

MODULE 7

- Preparing files for Web.
- Exporting HTML and Images
- Web Gallery Creation
- Creating Slices

MODULE 8

- 3D Images & Animation
- Positioning of 3D layers in a Scene
- Lighting a 3D scene
- Rendering a 3D scene
- Creating effects
- Animating text with keyframes

CorelDraw Module

MODULE 1

- Getting started with Corel Draw
- Introduction to Corel Draw
- Features of Corel Draw
- Corel Draw Interface
- Tool Box

MODULE 2

- Moving from Adobe Illustrator to Corel Draw
- Common Tasks

- Drawing and Coloring
- Introduction
- Selecting Objects
- Creating Basic Shapes

MODULE 3

- Reshaping Objects
- Organising objects
- Applying color fills and Outlines
- Mastering with Text
- Introduction
- Text Tool

MODULE 4

- Artistic and paragraph text
- Formatting Text
- Embedding Objects into text
- Wrapping Text around Object
- Linking Text to Objects
- Applying Effects

MODULE 5

- Introduction
- Power of Blends
- Distortion
- Contour Effects
- Envelopes

MODULE 6

- Lens effects
- Transparency
- Creating Depth Effects
- Power Clips
- Working with Bitmap Commands

MODULE 7

- Introduction
- Working with Bitmaps
- Editing Bitmaps
- Applying effects on Bitmaps
- Printing

MODULE 8

- Corel Draw- Web resources
- Introduction
- Internet Tool bar
- Setting your webpage

MODULE 9 & 10

- Exporting files
- Creating buttons with rollover effects

Adobe Illustrator Module

MODULE 1

- Introduction to Illustrator
- New features summary
- Workspace basics
- Tools

MODULE 2

- Workspace basics
- Customize the workspace
- Create documents
- Properties panel
- Artboards
- Tools
- Tool galleries
- Safe Mode
- Set preferences
- View artwork
- Rulers, grids, and guides

MODULE 3

- Drawing basics
- Draw pixel-perfect art
- Draw simple lines and shapes
- Perspective drawing
- Edit paths
- Adjust path segments
- Symbols
- Create 3D objects
- Define perspective grids
- Draw pixel-aligned paths for web workflows
- Draw with the Pen, Curvature, or Pencil tool

MODULE 4

- Adjust colors
- Select colors
- Use the Adobe Color Themes panel
- Use and create swatches
- Color groups (harmonies)
- Color Themes panel

MODULE 5

- About painting
- Gradients
- Paint with fills and strokes
- Brushes
- Live Paint groups
- Transparency and blending modes
- Stroke an object
- Meshes
- Create and edit patterns
- Patterns

MODULE 6

- Select objects
- Move, align, and distribute objects
- Layers
- Stack objects
- Group and expand objects
- Lock, hide, and delete objects
- Duplicate objects
- Rotate and reflect objects

MODULE 7

- Crop images
- Cut, divide, and trim objects
- Transform objects
- Puppet Warp
- Combine objects
- Scale, shear, and distort objects
- Blend objects
- Reshape using envelopes
- Reshape objects with effects
- Edit clipping masks

MODULE 8

- Import artwork files
- Save artwork
- Export artwork
- Collect assets and export in batches
- Creative Cloud Libraries in Illustrator
- Import bitmap images
- Import Adobe PDF files
- Import artwork from Photoshop

MODULE 9

- Create Adobe PDF files
- Adobe PDF options
- Import and export text
- Fonts
- Format paragraphs
- Format type
- Special characters
- Create type on a path
- Scale and rotate type
- Character and paragraph styles
- Line and character spacing

MODULE 10

- Create special effects
- Create sketches
- Create a drop shadow
- Drop shadows, glows, and feathering
- Summary of effects
- Set up documents for printing

Adobe InDesign Module

MODULE 1

- Introduction to InDesign
- New features summary
- Create documents
- Workspace and workflow
- GPU Performance
- Workspace basics
- Set preferences
- Toolbox
- Customize menus and keyboard shortcuts
- Recovery and undo
- Adjust your workflow
- Work with managed files
- View the workspace
- Save documents

MODULE 2

- Layout and design
- Create a table of contents
- Add basic page numbering
- Create text and text frames
- About pages and spreads
- Create an index
- Create documents
- Text variables
- Create type on a path
- Linked content
- Align and distribute objects
- Lay out frames and pages
- Clipping

MODULE 3

- Text
- Wrap text around objects
- Endnotes
- Glyphs and special characters
- Bullets and numbering
- Find/Change
- Anchored objects
- Footnotes
- Add text to frames
- Edit
- Captions

MODULE 4

- Styles
- Paragraph and character styles
- Object styles
- Drop caps and nested
- Work with styles

MODULE 5

- Typography
- Text composition
- Format paragraphs
- Align text
- Using fonts
- Format text
- Format characters
- Leading
- Kerning and tracking
- Work with Typekit fonts

MODULE 6

- Tables
- Format tables
- Create tables
- Table and cell styles
- Select and edit tables
- Table strokes and fills

MODULE 7

- Interactivity
- Hyperlinks
- Bookmarks
- Buttons
- Animation
- Cross-references

MODULE 8

- Drawing and painting
- Draw with lines and shapes
- Edit paths
- Understand paths and shapes
- Draw with the Pencil tool
- Draw with the Pen tool
- Compound paths and shapes

MODULE 9

- Color
- Apply color
- Use colors from imported
- Work with swatches
- Tints
- Understand spot and process colors
- Gradients

MODULE 10

- Export and publish
- Publish Online
- Adobe PDF options
- Export content to HTML

- Export to Adobe PDF
- Export to JPEG format

Adobe Premiere Pro Module

MODULE 1

Adobe Premiere Pro Training

- Nonlinear editing in Adobe Premiere Pro
- Expanding the workflow
- Touring the Adobe Premiere Pro workspace

Setting Up a Project

- Setting up a project
- Setting up a sequence

Importing Media

- Importing assets
- Working with the Media Browser
- Importing images
- The media cache

Organizing Media

- The Project panel
- Working with bins
- Organizing media with content analysis
- Monitoring footage
- Modifying clips

MODULE 2

Essentials of Video Editing

- Using the Source Monitor
- Navigating the Timeline
- Essential editing commands

Working with Clips and Markers

- Program Monitor controls
- Controlling resolution
- Using markers
- Using Sync Lock and Track Lock
- Finding gaps in the Timeline
- Selecting clips
- Moving clips
- Extracting and deleting segments

Adding Transitions

- What are transitions?
- Edit points and handles
- Adding video transitions
- Using A/B mode to fine-tune a transition
- Adding audio transitions

MODULE 3

Advanced Editing Techniques

- Four-point editing
- Retiming clips
- Replacing clips and footage
- Nesting sequences
- Regular trimming
- Advanced trimming
- Trimming in the Program Monitor panel

Putting Clips in Motion

- Adjusting the Motion effect
- Changing clip position, size, and rotation
- Working with keyframe interpolation
- Using other motion-related effects

MODULE 4

Multicamera Editing

- Importing assets
- Working with the Media Browser
- Importing images
- The media cache

Editing and Mixing Audio

- Setting up the interface to work with audio
- Examining audio characteristics
- Adjusting audio volume
- Creating a split edit
- Adjusting audio levels in a sequence

MODULE 5

Sweetening Sound

- Sweetening sound with audio effects
- Adjusting EQ
- Applying effects in the Audio Mixer
- Cleaning up noisy audio

Adding Video Effects

- Working with effects
- Keyframing effects
- Effects presets
- Frequently used effects

MODULE 6

Color Correction and Grading

- Color-oriented workflow
- An overview of color-oriented effects
- Fixing exposure problems
- Fixing color balance
- Special color effects
- Creating a look

MODULE 7

Creating Titles

- What is an alpha channel?
- Making compositing part of your projects
- Working with the Opacity effect
- Working with alpha-channel transparencies
- Color keying a greenscreen shot
- Using mattes

MODULE 8

Creating Titles

- An overview of the Titler window
- Video typography essentials
- Creating titles
- Stylizing text
- Working with shapes and logos
- Making text roll and crawl

MODULE 9

Managing Your Projects

- The File menu
- Using the Project Manager
- Final project management steps
- Importing projects or sequences
- Managing collaboration
- Managing your hard drives

MODULE 10

Exporting Frames, Clips, and Sequences

- Overview of export options
- Exporting single frames
- Exporting a master copy
- Working with Adobe Media Encoder
- Exchanging with other editing applications
- Recording to tape
- Exporting DVD

Adobe After Effects Module

MODULE 1

- New features summary
- Keyboard shortcuts reference
- After Effects
- Workflows

MODULE 2

- General user interface items
- Working with After Effects and other applications
- Workspaces, panels, and viewers

MODULE 3

- Projects
- Composition basics

- Pre composing and pre-rendering
- Time code and time display units

MODULE 4

- Importing and interpreting footage items
- Importing and interpreting video and audio
- Preparing and importing 3D image files
- Working with footage items
- Importing from After Effects and Adobe Premiere Pro
- Preparing and importing still images

MODULE 5

- Creating layers
- Selecting and arranging layers
- Managing layers
- Layer properties
- Blending modes and layer styles
- Layers
- Cameras, lights, and points of interest

MODULE 6

- Animation basics
- Setting, selecting, and deleting key frames
- Editing, moving, and copying key frames
- Key frame interpolation
- Speed Time-stretching and time-remapping
- Tracking 3D camera movement
- Face Tracking
- Animating with Puppet tools
- Tracking and stabilizing motion

MODULE 7

- Color basics
- Color management

MODULE 8

- Paint tools: Brush, Clone Stamp, and Eraser
- Overview of shape layers, paths, and vector graphics
- Creating shapes and masks
- Managing and animating shape paths and masks
- Mask Tracking

MODULE 9

- Creating and editing text layers
- Formatting characters and the Character panel
- Examples and resources for text animation
- Animating text
- Extruding text and shape layers
- Formatting paragraphs and the Paragraph panel

MODULE 10

- Compositing and transparency overview and resources

- Alpha channels, masks, and mattes Keying
- Roto Brush, Refine Edge, and Refine Matte effects

MODULE 11

- Layer markers and composition markers

MODULE 12

- Basics of rendering and exporting
- Rendering and exporting still images and still-image sequences
- Converting movies

MODULE 13

- Plug-ins
- Automation
- Expression basics

MODULE 14 & 15

- Particles

Adobe Audition Module

CHAPTER 1

- Introduction to Adobe Audition
- What's new in Adobe Audition
- Audition system requirements
- Customizing workspaces
- Reduce noise and restore audio
- How to Reduce Noise and Restore Audio in Adobe Audition
- Finding and customizing shortcuts
- Adobe Audition manual (PDF)
- Applying effects in the Multitrack Editor

CHAPTER 2

- Workspace and setup
- Control surface support
- Viewing, zooming, and navigating audio
- Connecting to audio hardware in Audition
- Customizing and saving application settings

CHAPTER 3

- Digital audio fundamentals
- Understanding sound
- Digitizing audio

CHAPTER 4

- Importing, recording, and playing
- Multichannel audio workflow
- Create, open, or import files in Adobe Audition
- How to Create, Open, and Import files to Adobe Audition
- Importing with the Files panel
- Extracting audio from Cds
- Supported import formats

- Navigate time and playing audio in Adobe Audition
- Recording audio
- Monitoring recording and playback levels 9

CHAPTER 5

- Applying effects
- Enabling CEP extensions
- Effects controls
- Applying effects in the Waveform Editor
- Adding third party plugins
- Notch Filter effect
- Fade and Gain Envelope effects (Waveform Editor only)
- Manual Pitch Correction effect (Waveform Editor only)
- Graphic Phase Shifter effect
- Doppler Shifter effect (Waveform Editor only)
- ADOBE AUDITION
- Contents

CHAPTER 6

- Effects reference
- Apply amplitude and compression effects to audio
- Delay and echo effects
- Diagnostics effects (Waveform Editor only) for Audition
- Filter and equalizer effects
- Modulation effects
- Reverb effects
- How to use special effects with Audition
- Stereo imagery effects
- Time and pitch manipulation effects

CHAPTER 7

- Mixing multitrack sessions
- Creating remix
- Multitrack Editor overview
- Basic multitrack controls
- Multitrack routing and EQ controls
- Arrange and edit multitrack clips with Audition
- Looping clips
- How to match, fade, and mix clip volume with Audition
- Automating mixes with envelopes
- Hardware controllers and recordable automation
- Multitrack clip stretching

CHAPTER 8

- Video and surround sound
- Working with video applications
- Importing video and working with video clips

CHAPTER 9

- Keyboard shortcuts
- Default keyboard shortcuts

CHAPTER 10

- Saving and exporting
- Save and export audio files
- Viewing and editing XMP metadata

MOHO Module

MODULE 1

- A Quick Run-through
- Drawing Simple Shapes
- Drawing Complex Shapes
- Bone Setup
- Animation

MODULE 2

- Drawing
- Welding
- Drawing Shapes with Holes
- Hidden Edges
- Shape Ordering
- Brushes
- Layer Masking
- Styles
- Simple 3D Construction
- 3D Shape Design

MODULE 3

- Bones
- Bone Binding
- Bone Constraints
- Bone Dynamics
- Character Setup

MODULE 4

- Images
- Image Layers
- Image Warping
- Image Textures
- Animating a Talking Head

MODULE 5

- Animation
- Automatic Lip-Sync
- Phoneme Lip-Sync
- Cycling
- Animation Curves
- Sorting Layers by Depth
- Actions
- Frame by Frame Animation
- Creating a 3D Scene
- Basic Physics

MODULE 6

- Effects
- Shadow Tricks
- Camera and Depth Effects
- Moon and Clouds Effect
- Particles
- Particle Tricks - Grass and Crowds
- Using Pre-made Particle Effects
- Speeding Up Particle Effects
- Perspective Shadows
- Using 3D Models

Autodesk Maya Module

LESSON 1

- The Maya User interface
- Starting Maya
- The Maya interface
- saving your work

LESSON 2

- Creating , manipulating and viewing objects
- Creating a new scene
- Primitive objects
- The toolbox layout shortcuts
- The toolbox transformation tools
- The channel box

LESSON 3

- Viewing the maya 3D Scene
- Camera Tools
- workflow overview
- viewing objects in shading modes
- Grouping objects
- The Hypergraph
- Selection modes and masks
- Pivot Points
- Save your work
- Beyond the lesson
- Polygon Modeling

LESSON 4

- Modeling a Polygon mesh
- Using 2D reference images
- Creating a Polygon primitive
- Modeling in shaded mode
- Model Symmetry
- Selecting components by painting
- Selecting Edge loops
- drawing a polygon
- Extruding polygon component
- Bridging between edges

- Adding polygons to a mesh
- splitting polygon faces
- Terminating edge loops
- Deleting construction history
- mirror copying a mesh
- previewing a smoothed mesh
- beyond the lesson
- Nurbs Modeling

LESSON 5

- Revolving a curve to create a surface
- Creating a profile curve
- Creating a revolve surface
- Editing a revolve surface

LESSON 6

- Sculpting a NURBS surface
- Preparing a surface for sculpting
- Basic sculpting techniques
- Additional sculpting techniques
- sculpting a face

LESSON 7

- Lofting curve to create a surface
- Creating profile curves for a surface
- Duplicating curves
- lofting a surface
- modifying a primitive object
- using the outliner to parent objects
- Subdivision Surfaces

LESSON 8

- Modeling a subdivision surface
- Creating a subdivision surface
- Splitting a surface in polygon proxy mode
- Extruding Polygon faces
- deleting polygon faces
- Subdivision Surface levels
- Refining surface components
- Creating a crease in a subdivision surface
- Animation

LESSON 9

- Keyframes and the graph editor
- Setting the playback range
- Setting Keyframes
- Using the graph editor
- Changing the timing of an attribute
- Fine Tuning an Animation
- Deleting Extra keyframes and static channels
- Using Playblast to playback an animation

LESSON 10

- Set Driven Key
- Set Up
- Using set driven key to link attributes
- viewing the results in the graph editor

LESSON 11

- Path Animation
- Animating an object along a motion path
- changing the timing of an object along a motion path
- Rotating an object along a motion path
- Blending Key frame and motion path animation
- Using play blast to playback an animation

LESSON 12

- Inverse Kinematics
- Open the scene for the lesson
- Understanding hierarchies
- Viewing hierarchies using the hyper graph
- creating a skeleton hierarchy
- parenting a model into a skeleton hierarchies
- Apply IK into a skeleton hierarchy
- Creating a control object for an icon system
- Constraining an Ik System
- Limiting the range of motion of an IK system
- Simplifying the display of hierarchy
- Applying parent constraints of an IK system
- Planning an animation for an IK system
- Animating an Ik system

LESSON 13

- Nonlinear animation with trax
- Open the first scene for the lesson
- Creating clips with trax
- Changing the position of clips with trax
- Editing the animation of clips
- Reusing clips with in trax
- Soloing and muting trax
- Scaling clips with in trax
- Open the second scene for the lesson
- Creating clips from motion capture data
- Extending the length of motion capture data
- Redirecting the motion with in a clip
- Beyond the lesson
- Character Setup

LESSON 14

- Skeleton and kinematics
- Open the scene for the lesson
- Creating Joints
- Adding joints to a skeleton
- Creating a skeleton hierarchy

- Forward and inverse kinematics
- Posing and animating using inverse kinematics
- Posing and animating using forward kinematics

LESSON 15

- Smooth skinning
- Open the scene for the lesson
- Smooth binding a skeleton
- Skin weighting and deformations
- Modifying skin weights
- Influence objects

LESSON 16

- Cluster and blend shape deformers
- Open the scene for the lesson
- Creating a target object for a blend shape
- Creating a cluster deformer on a target object
- Editing cluster weights
- Creating a blend shape
- Refining deformation effects
- Adding target objects to an existing blend shape
- Polygon Texturing

LESSON 17

- UV Texture Mapping
- Creating a cracker box model
- Applying a texture map to a polygon mesh
- Viewing UVs in the UV texture editor
- Mapping UV texture coordinates
- Working with UVs in the UV texture editor
- Selecting UV components
- Sewing Uvs
- Moving UV components
- Rendering

LESSON 18

- Rendering a scene
- Open the scene for the lesson
- Creating shading materials for objects
- Refining shading materials for objects
- Maya renderers
- The render view window
- Rendering a Single frame using IPR
- Rendering using the maya software renderer
- Batch rendering a sequence of animation frames
- Viewing a sequence of rendered frames
- Shading Surfaces

LESSON 19

- Open the scene for the lesson
- Assigning a shading material
- Modifying surface specularities

- Material types
- Assigning textures
- Using the hyper shade editor
- Creating a texture with in the hyper shade editor
- Modifying a bump texture
- Lights , shadows and cameras

LESSON 20

- Open the scene for the lesson
- Directional Lights
- Spot Lights
- Editing Lights Attributes
- Shadows
- Creating additional cameras in a scene
- Animating camera moves

Autodesk Max Module

CHAPTER 1

- Getting to Know Autodesk 3ds Max
- Introducing the New 3ds Max
- Getting Started with Autodesk 3ds Max
- Touring the Interface
- The Menu Bar
- The Quick Access Toolbar
- The Information Center Toolbar
- The Main Toolbar
- Docked and Floating Toolbars
- Toolbar Flyouts
- The Viewports
- Tools for Working with the Viewports
- Getting to Know the Command Panel
- Understanding the 3ds Max Tools
- Working with Objects
- Selecting and Moving Objects
- Rotating and Scaling Objects
- Copying an Object
- Selecting Multiple Objects
- Naming Selection Sets
- Editing Named Selection Sets
- Getting the View You Want
- Understanding the Perspective Viewing Tools
- Using Multiple Viewports
- Changing the Viewport Display and Configuration
- Working with the Custom UI And Defaults Switcher
- The Bottom Line

CHAPTER 2

- Introducing Objects
- Understanding Standard Primitives
- Adjusting an Object's Parameters
- Accessing Parameters

- Introducing the Standard Primitive Objects
- Modeling Standard Primitives with Modifiers
- Adding a Modifier
- Accessing Modifier Parameters
- Placing Modifiers Where You Want Them
- Using the Modifier Stack Tools
- How 3ds Max Sees Objects
- Making Clones That Share Properties
- Creating an Instance Clone
- Creating a Reference Clone
- Scaling and Rotating Objects with Transform Tools
- Making a Clone Unique
- Cloning a Modifier
- Introducing Extended Primitives
- Modeling a Couch
- Working with Groups
- Grouping the Components of the Couch
- Working within Groups
- Disassembling Groups
- The Bottom Line

CHAPTER 3

- Creating Shapes with Splines
- Drawing with Splines
- Drawing Straight-Line Segments
- Constraining Lines Vertically and Horizontally
- Drawing Curves
- Lathing a Spline
- Modifying a Shape Using Sub-object Levels
- Adjusting the Lathe Axis
- Flipping Surface Normals
- Smoothing Spline Corners
- Adjusting Tangent Handles
- Creating Thickness with a Spline
- Detailing the Wineglass Base
- Finishing the Wineglass
- Outlining and Extruding Splines
- Drawing Accurate Splines
- Giving Walls Thickness
- Using Grids and Snaps to Align Objects Accurately
- Adjusting a Wall Location
- Combining and Extruding Primitive Splines
- Combining Splines
- Joining Closed Splines with Boolean Tools
- Creating a Solid Form with Splines
- Introducing the Other Spline Types
- Editing Splines
- Placing and Beveling Text
- The Bottom Line

CHAPTER 4

- Editing Meshes and Creating Complex Objects
- Creating Openings in a Wall with Boolean Operations
- Hiding Shapes That Get in the Way
- Creating the Shape of the Opening
- Subtracting the Opening from the Wall
- Creating Multiple Openings in a Single Wall
- Making Changes to the Opening
- Tracing a Sketch
- Using a Bitmap Image
- Scaling the Image Plane to the Model's Size
- Tracing the Image
- Building Objects from Traced Lines
- Editing Meshes
- Creating a Tapered Wall
- Converting the Spline to a Mesh
- Moving a Single Mesh Vertex
- Tapering the Top of the Wall
- Using Instanced Clones to Create Symmetrical Forms
- Adding a User Grid to Aid Tracing
- Building the Tower Walls
- Adding the Vaulted Ceiling
- Creating the Smaller Towers
- Drawing the Remaining Walls
- Attaching Objects to a Mesh
- Smoothing Meshes
- Smoothing within a Mesh
- The Smooth Modifier
- Creating and Modifying Objects Using Box Modeling
- Preparing a Box for Box Modeling
- Using the Transform Toolbox
- Creating Clones with Array and Snapshot
- Creating a Pew Grid with Array
- Creating a Multitransform Polar Array
- Creating Multiple Clones Using Snapshot
- The Bottom Line

CHAPTER 5

- Working with External Design Data
- Creating Topography with Splines
- Updating Changes from an AutoCAD File
- Exploring Terrain Options
- Setting Up an AutoCAD Plan for 3ds Max
- Importing AutoCAD Plans into 3ds Max
- Extruding the Walls
- Extruding Exterior Wall Headers
- Extruding the Mullions
- Creating Interior Wall Headers
- Adding Glass
- Creating a Floor with Openings
- Exploring the Manage Links Dialog Box
- Editing Linked AutoCAD Files

- Understanding the Block Node Hierarchy
- Understanding the Manage Links Options
- Understanding File Link Settings
- Importing Adobe Illustrator Files into 3ds Max
- Importing Autodesk Inventor Files into 3ds Max
- Using the Substitute Modifier with Linked Geometry
- Importing a Truss
- Linking Revit Files into 3ds Max
- Linking the Revit File in 3ds Max
- Using the Scene Explorer
- Importing FBX Files into 3ds Max
- The Bottom Line

CHAPTER 6

- Organizing and Editing Objects
- (Re)Naming Objects
- Renaming the Ceiling Fixtures
- Organizing Objects by Layers
- Setting Up Layers
- Assigning Objects to Layers
- Assigning Color to Layers
- Understanding the Icons in the Layer Dialog Box
- Lofting an Object
- Setting Up the Shapes to Form the Pedestal
- Lofting a Shape along a Path
- Using Different Shapes along the Loft Path
- Fine-Tuning a Loft Object
- Using the Instance Clones to Edit the Loft
- Using the Noise Modifier
- Modeling with Soft Selection
- Extruding with the Sweep Modifier
- Aligning Objects
- The Bottom Line

CHAPTER 7

- Light and Shadow
- Lighting Your Model
- Understanding the Types of Lights
- Adding a Spotlight to Simulate the Sun
- Moving a Light
- Editing a Spotlight
- Changing the Light Type
- Rendering a View
- Ambient Light
- Faking Radiosity
- Adding a Highlight with an Omni Light
- Looking at Omni Light Options
- Adding Shadow Effects
- Softening Shadow Edges
- Understanding Shadow Maps
- Using Ray-Traced Shadows
- Using Advanced Ray Traced and Area Shadows

- Playing in the Shadows
- Using Two Suns
- Adding a Second Sun
- Using Unseen Objects to Cast Shadows
- Using a Clone to Cast Shadows
- Using the Light Lister
- Using Scene States
- The Bottom Line

CHAPTER 8

- Enhancing Models with Materials
- Understanding Bitmap Texture Maps
- Diffuse Color Maps
- Surface Properties
- The Architectural Material's Physical Qualities Rollout
- The Special Effects Rollout
- Ink 'n Paint Material
- DirectX Shader
- Adding Materials to Objects
- Adding a Map Path to Help 3ds Max Find Bitmaps
- Understanding Material Libraries
- Editing Materials
- Using Bump Maps
- Creating a New Material
- Adding Material Mapping Coordinates
- Understanding Mapping Coordinates
- What Happens When You Add the Mapping Coordinates?
- Adjusting the UVW Map Gizmo
- Using the Standard Material
- Map Scalar Modifiers
- Spline Mapping
- Adding Entourage
- Hiding Unwanted Surfaces with Opacity Maps
- Adjusting an Object to a Bitmap Shape
- Assigning Materials to Parts of an Object
- Creating a Multi/Sub-object Material
- Applying a Sub-material to an Object's Surface
- Exploring the Autodesk Materials
- Adjusting the Autodesk Material Parameters
- Using the Material Explorer
- The Material Utilities
- Modeling with Displacement Maps
- Using the Displace Modifier
- Using the Material Editor to Create Displaced Geometry
- Converting a Displacement Map into an Editable Mesh
- Creating an Editable Mesh from a Displacement Map
- Additional Mapping and Material Features
- The Bottom Line

CHAPTER 9

- Using the Camera
- Understanding the 3ds Max Camera

- Adding a Camera
- 3ds Max Viewport Improvements
- Editing the Camera Location with the Viewport Tools
- Setting Up an Interior View
- Creating an Environment
- Making Adjustments to the Background
- Using Immersive Environments for Animation
- Creating a Believable Background
- Using a Texture Map and Hemisphere for the Sky
- Using Render Types
- Using Render Elements for Compositing
- Matching Your Scene to a Background Image
- Setting Up the Model and the Image
- Adding the Background Image
- Adding the Camera Match Points
- Aligning the Camera Match Points to the Background Image
- Fine-Tuning a Camera-Matched View
- Matching the Design Image Quality to the Background
- Standard Cinematic Terminology
- The Bottom Line

CHAPTER 10

- Organizing Objects and Scene Management
- Gaining Access to Materials and Objects from Other Files
- Arranging Furniture with XRefs and the Asset Browser
- Replacing Objects with Objects from an External File
- Substituting Objects for Faster Viewport Performance
- Importing Files with the Asset Browser
- Arranging Furniture with XRef Scenes
- Using the Rendered Frame Window
- Copying the Rendered Image
- Printing Images
- Opening Multiple RFWs for Comparisons
- Zooming, Panning, and Controlling Channels in the RFW
- Obtaining Colors from External Bitmap Files
- Tracking and Locating a Scene's Assets
- Creating Panoramas
- Publishing a DWF File
- The Bottom Line

CHAPTER 11

- Understanding Animation
- Understanding the World of Video Time
- Creating a Quick-Study Animation
- Adding Camera Motion
- Adjusting the Camera Path
- Viewing the Camera Trajectory
- Controlling the Camera Trajectory Visibility
- Creating a Preview Animation
- Understanding Keyframes
- Increasing the Number of Frames in an Animation Segment
- Accelerating and Decelerating the Camera Motion Smoothly

- Editing Keyframes
- Adding More Frames for Additional Camera Motion
- Adding Frames to the End of a Segment
- Adjusting the Camera Motion through a Keyframe
- Compressing and Expanding Time
- Adjusting the Camera Trajectory Using the Track View
- Increasing the Number of Frames between Selected Keys
- Speeding Up the Preview Rendering Time
- Adding Frames to the Beginning of a Segment
- Other Options for Previewing Your Motion
- Moving the Camera Target over Time
- Controlling Lights over Time
- The Bottom Line

CHAPTER 12

- Creating Animations, Particles, and Dynamics
- Rendering the Animation
- Creating a Study Animation
- Creating a Quick Overall Study Animation
- Adding a Moving Car
- Automating the Output of Multiple Still Images
- Setting Up a Camera for Elevations
- Setting Up the Four Elevations
- Rendering a Shadow Study
- Adjusting for True North
- Changing from an IES Sun to a Standard Light
- Creating a Walkthrough
- Fine-Tuning the Camera's Orientation
- Adjusting the Camera's Timing
- Adjusting the Path
- The Animation File Output Options
- True Color vs. 256 Colors
- File Naming in Animations
- Choosing an Image Size
- The AVI Codecsv>
- Using MassFX to Animate Objects
- Assigning Properties to Simulation Objects
- Setting Up and Running the Simulation
- Refining the Settings
- Using MassFX mCloth
- Using Particle Systems
- Creating the Initial Flow
- Adding and Editing the Operators
- Adding Materials and Space Warps
- Adding Deflectors
- The Bottom Line

CHAPTER 13

- Rigging for Animation
- Creating Parent–Child Hierarchies
- Using the Morpher Modifier
- Animating the Morpher Modifier

- Assembling an Articulated Luminaire
- Transforming Pivot Points
- Aligning the Light Source with the Fixture
- Using Schematic View
- Understanding Bones
- Understanding Biped
- The Bottom Line

CHAPTER 14

- Advanced Rendering Using mental ray
- Understanding mental ray
- Setting Up mental ray
- The Material Editor and mental ray
- Using Photon Maps
- Testing the Photon Map Effects
- Final Gathering
- Reviewing the Basic mental ray Workflow
- Contour Renderings
- Using the mr Multi/Sub-Map Material
- Skylight Global Illumination
- Image-Based Lighting and Skylight
- Using High Dynamic Range Images
- Using mr Proxy Objects
- Using IES Files
- The Bottom Line

CHAPTER 15

- Finishing It Off: Atmosphere, Effects, and Compositing
- Adding Atmospheric Effects
- Creating a Volume Light
- Adjusting the Volume Light Parameters
- Adding Fog
- Adding a Fire Effect
- Using Hair And Fur
- Adjusting the Hair And Fur Parameters
- Refining the Hair And Fur Parameters
- Using Glare
- Assigning the Glare Output Shader
- Using Depth of Field
- Creating Stereoscopic Renders in 3ds Max
- Using Autodesk Composite
- Composite the Stereo Pair into an Anaglyph Image.
- The Bottom Line
